DETAILED ACTION

Response to Amendment

1. The cancellation of Claim 85 in the submission dated 3/27/06 is acknowledged and accepted. In view of this cancellation, the objections to the claims in Section 10 of the Office Action dated 12/27/05 are respectfully withdrawn.

Response to Arguments

2. The claims of the instant application are currently only provisionally rejected under obviousness-type double patenting to corresponding claims in Application Nos. 10/661234, 10/661031, and 10/763995. Currently, none of these applications have been indicated as allowed and passed to issue. As per MPEP 804(I)(B)(1), since the only remaining rejections in the instant case are provisional obviousness-type double patenting rejections, these provisional obviousness-type double patenting rejections are withdrawn so as to permit the instant application to issue without the need for a terminal disclaimer. Therefore, the rejections in Sections 12-14 of the Office Action dated 12/27/05 are respectfully withdrawn.

Allowable Subject Matter

3. Claims 24-84, 86-87 are allowed.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

Claim 24 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest an optical identification element for identifying an item, an item having an optical identification element disposed therein, a method of reading a code associated with an optical identification element disposed on an item, and a method for labeling an item, as generally set forth in Claims 24, 65, 71, and 77, the element, item, and methods including, in combination with the features recited in Claims 24, 65, 71, and 77, a substrate being made of a substantially single material and having at least one diffraction grating embedded therein, the grating having a resultant refractive variation within the substantially single material, the grating providing an output signal indicative of a code identifying the item when illuminated by an incident light signal propagating from outside the substrate. Claims 25-64, 66-70, 72-76, 78-84, 86-87 are dependent on Claims 24, 65, 71, and 77, and hence are allowable for at least the same reasons Claims 24, 65, 71, and 77 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
